

OLIVE STONE

NATURAL BY NATURE. DISTINCT BY DESIGN.

NATURAL BY NATURE.
DISTINCT BY DESIGN.

A considered take on colour, Olive Stone brings an earthy sophistication to contemporary interiors. Its softened green tone draws from the natural world, balancing warmth and depth while pairing effortlessly with stone, timber, concrete and architectural finishes. Quietly distinctive, Olive Stone brings character without demanding attention, a considered point of contrast for spaces designed with intention.

**DESIGNED TO SIT
WITHIN THE PALETTE**

Olive Stone brings a grounded presence to the spaces around it, working naturally with timber, stone and textured surfaces. Its muted character allows different materials to sit together with balance, creating contrast without disrupting the overall composition.

A grounded green that sits comfortably between colour and calm, bringing the natural world into contemporary interiors. Its muted character creates a natural dialogue between colour, material and space, resulting in balance, depth and quiet cohesion.

**A FINISH DESIGNED
TO BRING HARMONY**

A considered finish for contemporary interiors, Olive Stone brings a grounded, natural character to tapware, allowing it to sit seamlessly within the wider material palette rather than simply exist as an accent.

At Par Taps, every detail matters.

For over four decades, we've redefined tapware in Australia through artistry, innovation and precision. As one of the first to introduce coloured tapware, we've continued to explore the relationship between colour, material and space.

Behind every product is a dedicated team committed to quality, craftsmanship and service.
