Floor Bath Filler

Installation Guide

Ver 26.2

Important Information

Prior to Installation:

- All instructions serve as a guide only and must be installed by a licensed plumber in accordance with AS/NZS 3500.1. Installation carried out by unlicensed individuals will void all warranties.
- Supply lines must be flushed prior to installation to remove any foreign matter.
- All products are suitable for use with most instantaneous hot water heaters, however are not compatible with gravity-fed water systems.

Water Pressure & Temperature:

This Par Taps products are to be installed by a Licensed Plumber in accordance with AS/NZS 3500.1

Maximum Water Temperature — — — — — — — — — — 65° Celsius

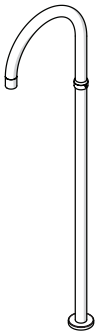
Regulatory Maximum Water Pressure — — — — — — — — 500kPa

Note: In areas where the recommended maximum water pressure is exceeded, pressure-limiting valves must be installed.

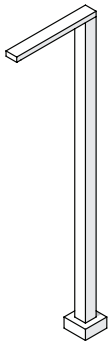
Cleaning

To maintain your Par Taps products and keep them looking new, we recommend using only mild soap and water, or a damp soft cloth to wipe tapware. Under no circumstances should any harsh detergents or abrasive cleaners be used.

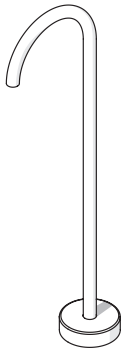
Floor Bath Filler Ranges



Lugano (Swivel)



Burj



Lugano (Fixed)

Lugano
Swivel
