Product Depictions in this Guide For illustrative purposes, Bell products have been featured in this guide. There will be variations in appearance between this guide and products ranges, but installation remains identical.

Part List

- 1. Measure centre distance between tap body holes in basin top and cut off tee piece (1) to desired length.
- 2. Install basin outlet with dress ring (if supplied) and sealing washer, position as required, fit locknut and tighten securely.
- 3. Fit Nuts and Nylon Olives to each end tee piece, connect to tap bodies (2) and tighten nuts lightly.
- 4. Fit one locknut (10) and one plastic washer (9) to each tap body (2)
- 5. Install complete assembly into basin top and ensure that the basin bodies (2) are just above the basin top surface. Ensure "O" rings on tee piece are not damaged as they enter the outlet tail. Adjust locknuts (10) so the tap bodies (2) protrude no more than 5mm above the basin top surface.
- 6. Fit plastic washer (9) and locknut (10) to each tap body (2), tighten nuts (10) securely. Ensure that bottom locknuts (10) are also secure and tighten all nuts
- 7. If trim rings are supplied please fit and tighten flange as well.
- 8. Fit handles and check all connections prior to turning water supply on.
