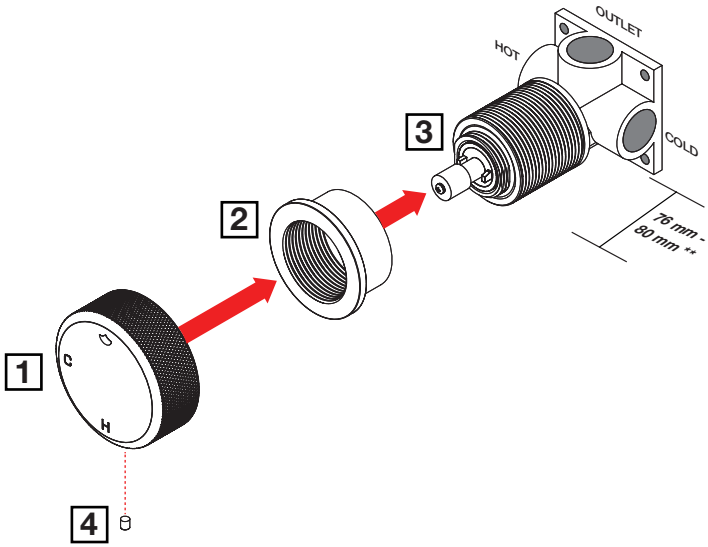
Wall Progressive Mixer



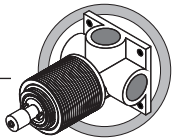
**** Mounting depth:**
76-80mm clearance

1. Mixer Handle
2. Trim Sleeve
3. Inner Wall Mixer Body
4. Grub Screw (Hidden Inside)

Product Depictions in this Guide

There will be variations in appearance between this guide and products ranges, but installation remains identical.

Rough-In



Wall Cut-out Profile, Sizes and Clearances

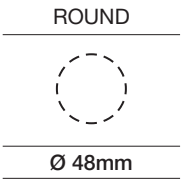


Fig 1

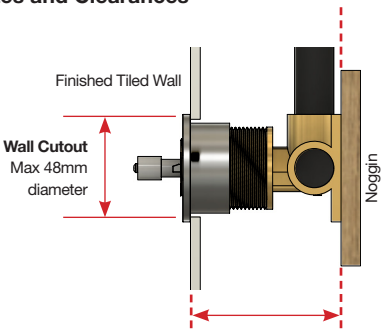

Fig 2

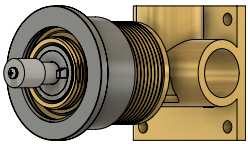

Fig 3

Rough-In Notes:

The hole sizing chart above (Fig 1) depicts the ideal profile and dimensions for wall cut out. This is to ensure the mixer Trim Sleeve (3) fits within the void over the mixer body without any interference.

Prior to installing, calculate the finished wall thickness to ensure the Trim Sleeve and Handle will fit the final assembly. **Recommended clearances indicated above** (Fig 2)**.**

1. Screw the Inner Wall Mixer Body (3) to the noggin (Fig A) or mounting plate (where fitted). Use a spirit-level to ensure mixer is straight.

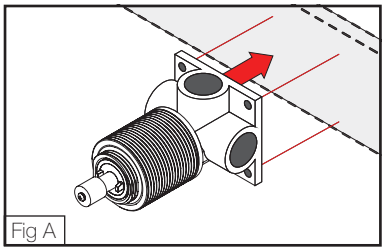

Fig A

2. Connect the water supply lines to the Inner Wall Mixer Body (3) (Fig B), then connect the water outlet (H+C). Test for any signs of leaks.

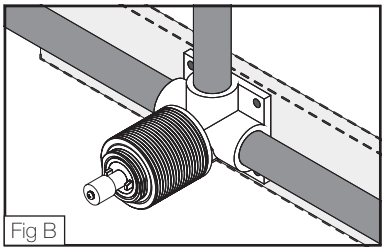

Fig B

3. Screw in the Mixer Trim Sleeve (2) over the Inner Wall Mixer Body (Fig C).

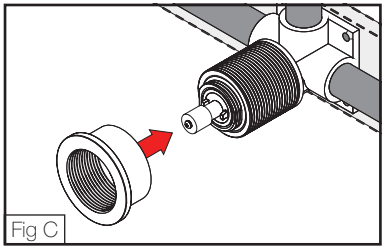

Fig C

4. Push fit the Mixer Handle (1) into the Inner Wall Mixer Body (3). Use grub screw (4) to tighten the connection

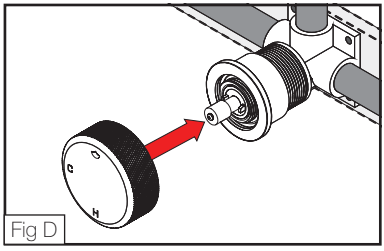

Fig D

Please Note: In the diagrams above, for clarity the tile wall face has not been depicted.
