Q Wood Collection

Installation Guide

Important Information -

Prior to Installation:

- · Please read these instructions completely.
- All instructions serve as a guide only and must be installed by a licensed plumber in accordance with AS/NZS 3500.1. Installation carried out by unlicensed individuals will void all warranties.
- Ensure water supply lines are closed.
- Supply lines must be flushed prior to installation to remove any foreign matter.
- All products are suitable for use with most instantaneous hot water heaters, however are not compatible with gravity-fed water systems.

Water Pressure & Temperature:

This Par Taps products are to be installed by a Licensed Plumber in accordance with AS/NZS 3500.1

Maximum Water Temperature — — — — — — — — — 80° Celcius

Maximum Water Pressure — — — — — — — — — — 1600kPa

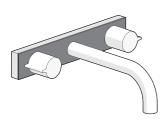

Regulatory Maxumim Water Pressure - - - - - - - 500kPa

Note: In areas where the recommended maximum water pressure is exceeded, pressure-limiting valves must be installed by a licensed plumber.

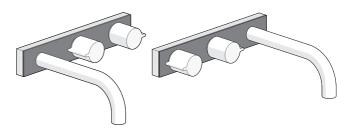

Product Care:

Our timber is untreaded, so will age naturally. The timber is finished with a splash-proof wax. Wiping dry after every use will prolong the life of the timber. Avoid abrasives.

WALL SET ON PLATE - OFFSET

TOP ASSEMBLYS

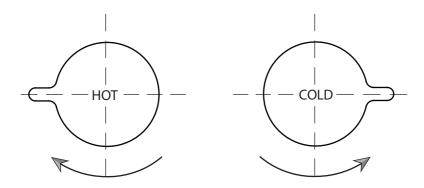

3 PIFCF SFT

200mm OUTLET

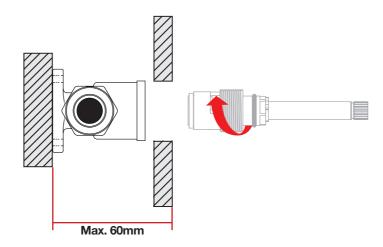

Handle Direction

Safety Note:

For your safety, Par Taps spindles are 'Contra Turn' designed. Handles should be fitted to turn/open towards the outlet thus preventing potential accidents such as scolding.

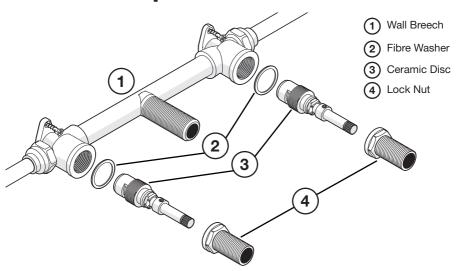

Wall Offset

Please Note:

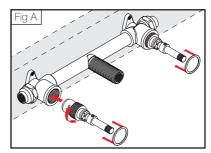

For correct fitment, it is essential that there is a 60mm space between the face of the noggin and wall surface. If this space is exceeded, longer spindle extensions will need to be fitted.

Wall set on plate

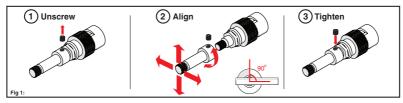

- Prior to installing ceramic disc assembly make sure the seat surface is clean and smooth otherwise reseat and recheck. Also ensure that lines have been flushed.
 - Ensure that the hot and cold indicators located on the bottom of the Ceramic Disc Assembly (3) are placed in the corresponding side of the breach.
- Insert ceramic disc assembly (3) into Wall breech. Tighten ceramic disc assembly (3) firmly using a 14mm Deep tube socket (not supplied). Then place the fibre washer (2) over the ceramic disc assembly (3) and onto the face of the Wall breech (1).

Align handle. Please refer to Fig 1 below.

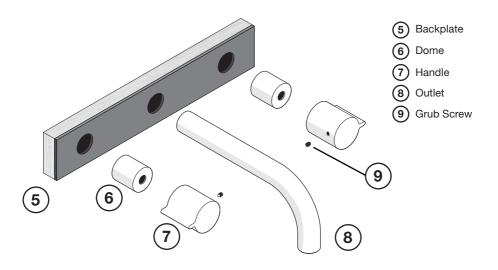

Handle Alignment

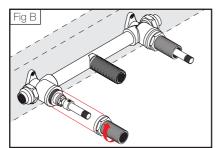

Firstly ensure that the disc is in the closed position and then fit handle to align.

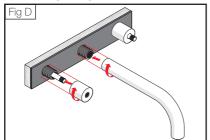

*Fig 1: To align the handle loosen grub screw from the extension using 2mm allen key, then rotate the position of the extension and ceramic disc cartridge until the desired handle position is achieved.

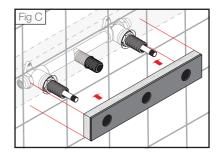

After the handle has been aligned, screw the Brass lock nut (4) onto the ceramic disc assembly (3) and tighten firmly using a 25mm deep tube socket.

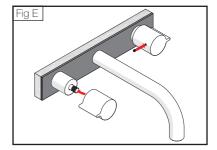

Install the outlet (8) prior to the domes (6) to secure the backplate (5) to wall surface. Please ensue that the backplate is level before tightening.

Slide the Backplate (5) over the ceramic disc assembly (3) onto the finished wall.

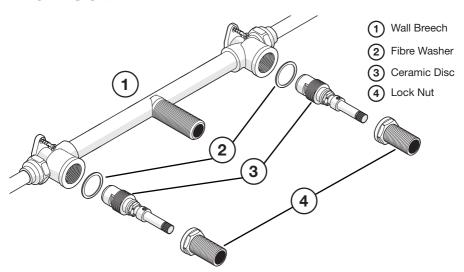

Firmly push the handle (7) to the main body (Fig E). Tighten the grub screw (9) to secure.

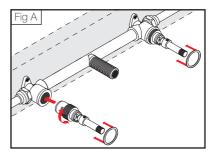

Please Note: In the diagrams above (Fig D & Fig E), for clarity the tile wall face has not been depicted.
